

QPC Part Counter

Finally... True Component Verification!

The Accutape Series QPC Parts Counter and Inspection Station incorporates a precision carrier tape sprocket coupled to a full quadrature encoder for positive and snag free results. The missing part sensor is activated at the precise point of the expected filled pocket arrival. Should a part be missing, the "Missing Part" LED is illuminated and the "Empty Pocket Counter" records the event. Abundant work space facilitates rework of tape and continues counting, without removing the reels.

The QPC offers...

- A true component counter with empty pocket detection
- Quickly locates and alerts operator to empty pockets
- Any surface mount component tape, clear or opaque
- Generous work area and comfortable for long runs
- Operator friendly setup and operation
- Accurate counts forward and reverse
- Totally portable and ergonomically designed

Innovative technology that you can "count" on for your production inspection needs!

SPECIFICATION	
Tape Types	Any
Tape Width	8-72 mm
Speed	300 parts / second
Weight	14 lbs.
Reel Size	13"
Electrical	110v 50 / 60Hz
Length	38 inches maximum
Height	12 inches
Weight	14 lbs.
