

QPT-300 Peel Force Tester

Accurate, Simple Determination of Cover Tape Peel Strength!

Testing of peel strength to EIA standards is simplified with the "Accutape Series" QPT-300. An integrated force gauge digitally displays readings utilizing multiple sampling methods including: Min/Max & Average or Continuous Update. By placing a sample in the machine, you can view the test results on the built-in instrument, an optional "strip chart recorder," or use the RS232 serial port (standard) and output to a PC. The compact, modular design means this machine is delivered the way you want it!

Options...

- Taped Reel Carrier* holds reeled carrier tape, and serves as a base for the machine
- SPC Software for your personal computer

**Increases height approximately 6 inches, while increasing length 2 inches.*

SPECIFICATION	
Peel Force Measuring Range	0-150 grams standard
Pull Speed	300 mm per minute
Pull Angle	175-180 degrees
Tape Widths Accepted	4-120 mm
Tape Materials Accepted	plastic and paper
Electrical Requirements	120vac 60Hz, 1 amp maximum
Length	19 inches maximum
Width	7 1/2 inches
Height	8 inches
Weight	14 lbs.
